Release Contained in Dike: No Reported to NRC: No Spilled Units Recovered Units Followup Units

| | Spilled | Units | Recovered | Units |
|-------|---------|---------|-----------|---------|
| Oil | 30 | gallons | 0 | barrels |
| Brine | 0 | barrels | 0 | barrels |
| Other | 0 | barrels | 0 | barrels |

Description of Other Released Contaminant:

Inspected: Written Report Received: 8/3/2016 Clean Up Concluded: 12/2/2013

Risk Evaluation:

Areal Extent:

20 feet by 100 feet

Potential Environmental Impacts:

Action Taken or Planned:

The oil was released to the flare extinguished the flare and created a mist that settled on the pad and adjacent area. The well has been shut in. The mist is currently on top of the snow. The oil impacted snow that is off site will be brought back onto the pad an managed with the oil impacted snow on the pad. This will most likely be placed back into one of the crude oil tanks for oil recovery. The othere oil impacted debris, if there is any, will be collected and sent for appropriate disposal.
